

Project Initialization and Planning Phase

Project Name:	Inquisitive: A Multilingual AI Question Generator Using Palm's Text-Bison-001
Team ID:	SWTID1720084901
Team members	Mayank gera Nandini Kapoor Naveen Kumar s Mohit

Problem Statement for Inquisitive: A Multilingual AI Question Generator

In our rapidly evolving digital age, characterized by information overload and time constraints, the need for efficient knowledge acquisition has become paramount. While AI has made significant strides in various fields, the creation of high-quality, diverse, and contextually relevant questions remains a challenging task. Whether for educational purposes, research, or content creation, the process of manually crafting questions is time-consuming and requires specialized expertise. To address this critical gap, there is a pressing need for an AI-powered solution that can automate the question generation process while maintaining exceptional quality standards.
